

## About AHCA

AHCA is a Medical facilitation company, based in Sydney

Our vision is to provide better health outcomes for overseas consumers by facilitating access to Australian healthcare excellence

We have curated a network of the premier hospitals and providers in Sydney. During COVID-19 we are offering a range of telehealth options across different specialties to support peoples' health

A leading **cancer** centre specialising in advanced cancer care. Lifehouse is an integrated and focused centre of excellence, offering everything a cancer patient needs in one place, including clinical trials and research projects, advanced onco-surgery, chemotherapy, radiation therapy, education, complementary therapies and psychosocial support.

# Technology, outcomes and customer experience

The latest technologies to fight cancer

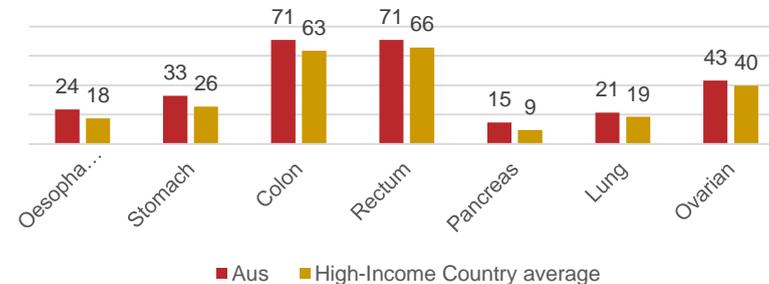

## Technology and science

Chris O'Brien Lifehouse currently have more than 140 clinical trials and research projects underway, including for new medications such as Ipatasertib for breast cancer and analyzing Circulating Tumour DNA. Chris O'Brien Lifehouse uses the latest version of a surgical robot to conduct less-invasive surgery in its cancer operating theatres. The da Vinci XI Surgical System (aka "the Robot") is one of the most advanced pieces of surgical hardware in the world today. The Modulated radiation therapy allows radiotherapy to be delivered as an array of microbeams. Finally, Chris O'Brien's researchers are working on an ambitious project to print bone replacements for transplant into cancer patients using a state-of-the-art 3D printer

## Patient outcomes

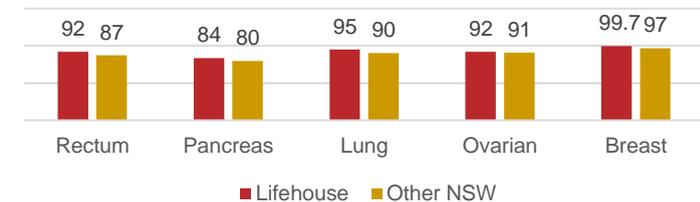

"There was consistently higher survival in Australia than in the other countries" – *World Health Organisation International Agency for Research on Cancer 2019*

### Five year cancer survival rate by cancer type (%)

...and Chris O'Brien has the best survival results in the largest Australian state

### One year survival rates by cancer type (%)

## Customer experience

Chris O'Brien patients have significantly better symptom control than the average in NSW, with lower reports of pain, tiredness, and nausea among other symptoms. It is also a new, state of the art hospital.
